Education

2022–2025 **BSc Mathematics**, GPA: 9.5/10, Radboud University, Nijmegen

2022–2025 **BSc Computer Science**, GPA: 9.5/10, Radboud University, Nijmegen

2016–2022 **VWO (Pre-university education)**, GPA: 9.5/10, Mill-Hill College, Goirle

- **Courses:** Physics (10/10), Chemistry (10/10), Biology (9/10), Mathematics B (10/10), Mathematics D (10/10), Latin (10/10), Spanish (10/10), English (9/10), Dutch (8/10)

Extracurricular

2023–2025 **Radboud Honours Programme Science**, Selection programme (25/year) for extracurricular research

2023 **Cornell, Maryland, Max Planck Pre-doctoral Research Summer School**, Accomodated summer school hosted by Max Planck Institute for Sofware Science, Saarbrücken (90/500+ applications).

2020–2022 **University Mathematics courses while in high school**, 39 EC, Radboud University, Nijmegen

- **Courses:** Linear Algebra A (10/10, 3 EC), Linear Algebra B (10/10, 3 EC), Probability Theory (9.5/10, 3 EC), Group Theory (10/10, 6 EC), Calculus A (10/10, 6 EC), Calculus B (10/10, 6 EC), Introduction Mathematics (10/10, 6 EC)

2019–2022 **Econasium Programme**, GPA: 9.6/10, Tilburg University, Tilburg

- **Courses:** Statistics for Econasium (9.6/10)

Honors & Awards

2021 **National Finalist Dutch Mathematical Olympiad**, (16th overall/ 9th in my age)

2022 **VWO Final Project Award, OMO**, *1st place (/34 high schools)*, €1200,-

- **Project Title:** "Optimizing Black Jack strategies using Reinforcement Learning"

2022 **Socrates Honours Award**, *For having obtained one of 10% highest GPAs among Dutch VWO students.*

2019 **W4 Kangaroo Mathematics Contest**, *Variant wizPROF, 130/150 points.*

Projects

- **Regression Analysis final project (R)**
  Course: "Statistics". click here for the R code and documentation (github).
- **Implementation of RUNCPU2023 Instruction Set Architecture in Digital**
  Course: "Processors". click here for design and documentation (github)
- **Simple shell, bounded/unbounded buffer, enhancing the caching behaviour of a program (C++)**
  Course: "Operating Systems". click **here** for code and documentation (github).
- **Dilworth-paritioning algorithm that uses Hopcroft-Karp (Python)**
  Course: "Algorithms and Datastructures". click **here** for code and documentation (github).
- **Personal web page**
  Used markdown, custom .svg's, hosted here with github pages.

Skills

- **Programming**
  Basic command of: Git, C, C++, Java, Haskell, Python.
  Coursework done in: OpenMP, MPI, R, SQL.
  You are invited to see my repositories and make your own judgement.

Languages

- **English:** B2/C1 (proficient)
  Exam: 9/10 . Read/Written, Listening/Spoken
- **Dutch:** C1/C2 (native)
  Exam: 8/10. Read/Written, Listening/Spoken
- **Spanish:** B1 (independent)
  Exam: 10/10. Read/Written, Listening/Spoken
- **French:** A2 (basic)
  Read/Written, Listening/Spoken
- **German:** A2 (basic)
  Read/Written, Listening/Spoken

Interests

Drawing & Watercolour.	*You can see my work on **my website** or **instagram**.*
Project Euler.	*User profile: **MatthijsMuis**.*
Running.	
Swimming.	
Chess.
